# Title of Seminar

Student Name and Roll no, (ECE1/ECE2/ECE3), ECE Department, BVCOE, New Delhi

## 1. INTRODUCTION (HEADING 1)

Brief Introduction of the IEEE conference/Journal article referred for the seminar. Students are advised to stick to the choice of papers related to the mini/minor project they worked and or would be working for in the current semester.

## 2. TOPIC OF DISCUSSION

### A. Subcategory (if any e.g. Description, Block Diagram etc.)

The template is used to format your paper and style the text. All margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. You may note peculiarities. For example, the head margin in this template measures proportionately more than is customary. Prepare Your Paper Before Styling. Include description of any block diagram/ or any algorithm explained in the referred paper. Note you may change the headings most suited in accordance with your paper.

This includes further methodology used to implement the work in the referred paper. Subcategories are not mandatory. This is done to create clarity of understanding by the student. Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract [1]. Do not use abbreviations in the title or heads unless they are unavoidable.

### B. Equations (if applicable)

You can use insert Equation in MS word. Number equations consecutively. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop. To make your equations more compact, you may use the solidus ( / ), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign. Punctuate equations with commas or periods when they are part of a sentence, as in:

$$a + b = \gamma \quad (1)$$

Note that the equation is centered using a centre tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation. Use "(1)", not "Eq. (1)" or "equation (1)", except at the beginning of a sentence: "Equation (1) is . . ."

## 3. RELEVANCE TO ENVIRONMENTAL AND SOCIETAL IMPACT OF SELECTED PROBLEMS

### REFERENCES

Minimum references should be 5. The template will number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3]—do not use "Ref. [3]" or "reference [3]" except at the beginning of a sentence: "Reference [3] was the first . . ."
